Business

At ADT, helping to protect your business is our business. With more than 140 years of experience in the industry and a dedicated business unit that helps protect small and mid-sized businesses across North America, ADT utilizes the latest technologies, such as cloud-based video offerings and ADT Pulse Interactive Business Solutions, to help address the industry's constant changing needs. With more than 200 nationwide sales and service offices, 24/7 security and fire protection monitoring, and innovative technologies, customers choose ADT Business for trusted peace-of-mind.

SERVICES & FEATURES

24/7 Monitoring

Peace of mind, even if your business closed.

Remote Arm/Disarm

Remotely set the alarm or turn it off from anywhere, anytime.

Interactive Video

Access secure, real-time video of employees, customers or vendors in your business.

Access Control Solutions

Monitor all sensitive areas and control access through all entry points.

Battery Backup

Help protect your business during a power outage with an independent power source to the security system.

Climate Management

Remotely turn your thermostat up and down to ensure the perfect temperature.

Appliance and Lighting Control

Control lights and small appliances to help manage energy costs.

Video Surveillance

Onsite and cloud storage solutions to help monitor your business from anywhere, for total visibility of overall business operations

Alert Notifications

Receive email or text alerts when activity is triggered at your location.

Intrusion Detection and Control

Help protect against unauthorized entry.

Fire Detection

Monitored fire panels, minimizing the risk of loss-of-life and property damage.

ADT BUSINESS SECURITY AND AUTOMATION

ADT Pulse Interactive

Business Solutions: Innovative technology featuring voice control to help manage a small business, whether across the country for work or across town at home. Remotely arm and disarm the system, adjust thermostats and view event-triggered videos, and more, with any web-enabled device, from almost anywhere with just the sound of your voice or a push of an app.

Intrusion Detection:

Affordable, effective protection against unauthorized entry with features such as holdup alarms, customizable keypads and chime notifications, door and window contacts, motion detection and optional backup cellular communication.

Video Surveillance:

High-quality video surveillance options to help protect against shoplifting, employee theft, vandalism and slip and fall liabilities, with features such as indoor, outdoor, day and night commercial-grade camera equipment, public and personal view monitors, and DVR and cloud-based storage for continuous recording.

Access Control Solutions:

Electronic Access Control offers flexible solutions to help control who and what enters and exits your business, through audio and video intercom systems, card-swipe readers for entry and exit points, and access solutions for areas with sensitive information.

Fire Detection:

Centralized monitoring from industry-leading ADT Alarm Monitoring Centers that will sound the alarm at the first signs of smoke or fire, alerting both you and the appropriate emergency response services.

The possibility of a fall or medical emergency should not threaten independence. With the touch of a button or a signal from a fall detection pendant, ADT Health customers can quickly contact trained ADT monitoring professionals who can notify the appropriate first responders and designated caregivers. ADT Health offerings are expanding to include Mobile Medical Alert systems as well as TeleHealth Monitoring Solutions. ADT is well positioned to expand in the growing remote health monitoring industry.

MEDICAL ALERT SERVICES

IN-HOME EMERGENCY RESPONSE

ADT's Medical Alert System provides seniors with a way to get help from virtually anywhere in their home, boosting their independence and their loved ones' peace of mind.

- The compact base station connects to a monitoring center through digital cellular or a traditional phone line.
- A press of the help button opens a two-way voice session with trained ADT professionals who can assess the situation and dispatch emergency response when needed.
- Our fall detection pendant can alert ADT in the event of a fall, even if the help button hasn't been pushed*.
- Waterproof pendants/wristbands provide consumers with options.
- High/low temperature sensor can send alert when unsafe temperatures are detected in the home.
- Now available for online purchase.

ON-THE-GO

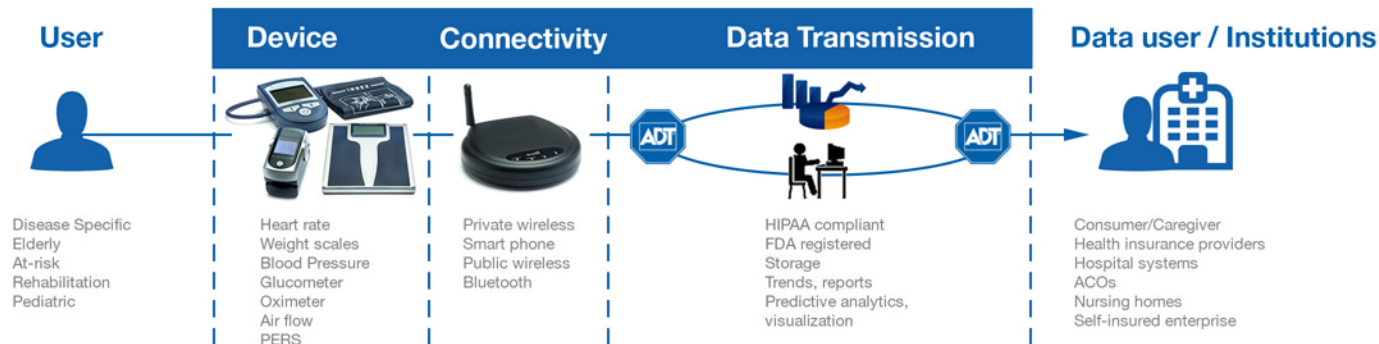

ADT's portfolio of Emergency Response solutions will soon include a mobile device that will enable users to call for help while they are at home and on-the-go.

- The mPERS is small, easy to carry, has built in two-way voice and location based services.
- Compatible with fall detection pendant, standard pendant and wristbands

TELEHEALTH MONITORING

Remote health monitoring is growing in popularity, helping to reduce healthcare costs and improve patient outcomes. ADT enables the remote collection and secure transmission of important health data so individuals and their healthcare providers can monitor and track their health in real time.
