

Medical Alert

An ADT Medical Alert System (Medical Alert Basic, Medical Alert Plus and On-The-Go Emergency Response) is not an intrusion detection system or medical device; ADT is not a '911' emergency medical response service and does not provide medical advice, which should be obtained from qualified medical personnel. Fall detection only available on Medical Alert Plus and On-The-Go Emergency Response system for \$5 per month (\$120/yr). The Fall Detection pendant does not detect 100% of falls. If able, users should always push their help button when they need assistance. Digital cellular service not available everywhere and at all times. The On-The-Go Emergency system and services use and rely on the availability of cellular network coverage and the availability of global positioning system (GPS) data to operate properly. The GPS is not operated by ADT. Prices may vary by market. Prices subject to change. Systems shall remain property of ADT. Photos are for illustrative purposes only and may not reflect the exact product/service actually provided. Price-Lock Guarantee excludes applicable taxes, fees or modifications to services after initial purchase.

QUICK INSTALLATION GUIDE

ADT Medical Alert Basic System

Medical Alert

Quick installation guide

Thank you for choosing this ADT Medical Alert Basic System. ADT is the most trusted name in security, with 140 years of experience. Live more confidently knowing that this system is ready 24/7/365. At the press of a button, a trained ADT professional can speak to you and get help if needed.

Medical Alert

STEP ONE

Select a location

- Choose a central part of your home where you spend the most time.
- The Base Station will need to be placed near an electrical outlet, away from noisy appliances and televisions.

STEP TWO

Turn on backup battery switch

- This important step ensures your system works even if the power goes out.
- Find the word “**Battery**” on the bottom of the Base Unit.
- Remove the switch cover with a pen or paper clip.
- With the pen or paper clip, slide the switch to the **on** (up) position, and then replace the switch cover.

STEP THREE

Connect the phone cord

- Provides the voice connection to ADT.
- Locate the Phone Cord that came with your system. Plug one end of it into the jack labeled “**This Plug to Wall Outlet**”, then plug the other end into the phone jack on your wall.
- **Note:** If your home telephone currently uses a wall jack, unplug the telephone’s cord from the wall and plug it into the jack on the Base Unit labeled “**Plug Phone or Other Device Here**”. Then connect the Base Unit to the wall as explained above.

STEP FOUR

Plug into outlet

- Plug the cord into the nearest electrical outlet.
- To avoid accidentally turning off the Base Unit, **do not** plug it into an outlet that is controlled by a light switch.

STEP FIVE

Call ADT to activate your system

- Call **800.498.8521**
- For monthly testing of your system, call **800.568.1216** and select option 1
