Thank you for choosing this ADT Medical Alert system. ADT is the most trusted name in security, with nearly 140 years of experience. Live more confidently, knowing that this system is ready 24/7/365. At the press of a button, a trained professional can speak to you and get help if needed.

Step 1:
Select a Location

- Choose a central part of your home where you spend the most time and away from noisy appliances and televisions.
- The Base Unit will need to be placed near an electrical outlet AND a phone jack.

Step 2:
Turn on the Backup Battery Switch

- This important step ensures your system works even if the power goes out.
- Find the word “BATTERY” on the bottom of the Base Unit.
- Remove the switch cover with a pen or paper clip.
- With the pen or paper clip, slide the switch to the ON (up) position (a paper clip or pen will be needed), and then replace the switch cover.

Step 3:
Connect the Phone Cord

- Locate the Phone Cord that came with your Base Unit. Plug one end of it into the jack on the Base Unit labeled "THIS PLUG TO WALL OUTLET," then plug the other end into the phone jack on your wall.
- NOTE: If your home telephone is currently using that wall jack, just unplug the telephone’s cord from the wall, and plug it into the jack on the Base Unit labeled "PLUG PHONE OR OTHER DEVICE HERE." Then connect the Base Unit to the wall as explained above.

Step 4:
Connect to the Electrical Plug

- Plug the Power Cord into the nearest electrical outlet.
- To avoid accidentally turning off the Base Unit, DO NOT plug it into an outlet that is controlled by a light switch.

Step 5:
Call ADT® to Activate your system

Call 800.568.1216 and select option 1.
