Setup your Alexa Device and ADT Pulse Skill in 5 Easy Steps

1. **Install Your Alexa Enabled Device.** Install your Amazon Echo or Echo Dot by following the instructions that came with the device.

2. **Log into the Alexa App.** Download the Amazon Alexa app on your iOS or Android device and login using your Amazon.com account credentials.

3. **Enable the ADT Pulse Skill.** To enable the ADT Pulse Skill, tap on the “Skills” option located in the left side menu within the Alexa app. Type in “ADT Pulse.” Select the “ADT Pulse” skill and then tap “Enable Skill.”

4. **Sync ADT Pulse with Alexa.** A login window will appear and you’ll be prompted to enter your ADT Pulse account login and password to sync your account with your Alexa device. This is required to connect Amazon Alexa with your ADT security system.

5. **Review Device Names in the Pulse web portal.** The exact name assigned to your ADT Pulse devices in the Pulse portal should be used when you give Alexa a command. Visit the ADT Pulse web portal at portal.adtpulse.com.

**VOICE CONTROL WITH AMAZON ALEXA**

**Using Your ADT System is as Easy as Talking to Amazon Alexa**

With the ADT Pulse skill, you can use your voice to manage your security and help keep your family and home safer.

Ask Alexa to tell ADT to do things like arm or disarm your system, capture video clips and even set your modes. Alexa can also provide you with the statuses of your security system and connected ADT devices, like telling you if you left the hall light on, what the current temperature is in your home, or if the front door is locked.

For extra security, ADT only allows certain security features like disarming the system, unlocking the doors and opening the garage to work by providing Alexa with a unique verbal PIN.

**What You Can Do**

“Alexa, ask ADT...”

- **Security.** “to disarm my system with 4792.”
- **Locks.** “to lock the Front Door.”
- **Lights.** “to turn off my Hallway Light.”
- **Status.** “to check the status of my system.”
- **Garage Door.** “to close the Garage Door.”
- **Batteries.** “is the ‘Front Door sensor battery low?”
- **Camera.** “to record a clip of my front door camera.”
- **Vacation.** “to set my mode to ‘Vacation’. “
- **Thermostat.** “the temperature of my thermostat.”
