Cannabis Solutions for Multi-State Operators

Your One Ideal Partner for all of your compliance-driven security, fire and life safety needs.
Responding to changing, complex industry compliance regulations and requirements

In the highly regulated cannabis industry, it is critical to find a security partner that understands the local and state requirements needed to protect your facilities—in every step of the process, from production to distribution.

Benefits for multi-state operators

As a multi-state operator, you can rely on ADT Commercial to not only have a qualified understanding of these regulations, but take that critical knowledge to design a comprehensive, integrated security approach for your facilities and help streamline your operations with solutions that drive efficiency:

- You’ll be supported by a National Account program specifically designed for multi-site locations spread across diverse geographies to aptly respond to each state or local government’s requirements and ensure compliance for all your facilities
- Our dedicated cannabis team stays up-to-date on the compliance standards that drive your business—so you never have to worry
- Our National Account program makes it easy for you to do business with us by offering a single point of contact and dedicated teams that work to ensure your facilities are protected and operational 24/7
- Our scalable, product-agnostic approach means your security, fire and life safety program can advance to meet your needs, at your pace
Helping you protect your employees, customers and facilities—while keeping your valuable product inventory secure

You face security threats in the cannabis industry that are wide-ranging and constantly evolving. These can include explosions and dangerous gas leaks during production, fire and life safety issues, inventory loss or damage, employee and customer theft, burglary, armed intruders, workplace violence incidents, trespassing, vandalism and more.

We’ll design a program that keeps life safety at the forefront, while focusing on loss prevention:

**Fire and life safety**
Integrated fire, fire suppression, and heat detection systems uphold OSHA compliance and employee safety standards, and help minimize site damage or inventory loss should a fire occur.

**Intrusion detection**
Intrusion detection systems help curb incidents of theft or site tampering by detecting vibration, motion, glass breakage and more.

**Access control**
Access control solutions track employee movement through facilities or limit entry of restricted areas to only authorized personnel.

**Gas detection**
Continuous gas detection and monitoring helps identify and respond to combustible gas or chemical releases.

**Cash handling**
Cash handling solutions like ATMs and ITMs help provide smooth retail operations and customer satisfaction while you protect your profit with UL vaults and safes.

**Real-time activity reporting**
eSuite℠ account management allows you to view critical information and business activity with trending graphs and customizable dashboards. Easily review location data essential to helping protect your business.

**Designed for the way you work**
Our enhanced mobile application adds flexibility by allowing your team to utilize the key features of eSuite on their mobile device.
Helping protect the unique facilities of the cannabis industry

No matter what type of facility you operate, we understand your threats and challenges and are ready to support you with premier security, fire and life safety solutions, 24/7 monitoring, and expert risk management and advisory services.
