

eSUITE<sup>SM</sup> ACCOUNT MANAGEMENT

# Real-Time Data to Help Manage Your Security Programs

**ADT**<sup>®</sup> Commercial

# ▼ eSuite is highly customizable and easily adapts to your ever-changing needs

eSuite presents your security data in one seamless experience by empowering your organization to access and manage real-time information.

## eSuite puts your data to work for you

This next-generation account management tool is highly intuitive to help you remotely manage your multi-location facilities.

The enhanced mobile application adds an incredible amount of flexibility, allowing your team to utilize key features of eSuite on their mobile device.

## eSuite mobile for the way you work today

- View and manage alarm activity dashboards
- Update contact lists and alarm codes
- Place intrusion alarm panels on and off test
- Request service calls
- View location product inventory

## Activity dashboards

Activity dashboards let you quickly view critical location activity in a summary activity map or as a trending graph. You can easily define a specific time period and then drill down using individual activity maps and graphs.

# It's feature rich and user-friendly

## ▶ Remote arm/disarm

Remote arm/disarm with cell or IP-connected panels allow display of system status on eSuite dashboard (armed, disarmed, or armed with bypass). Authorized users can arm and disarm systems remotely through eSuite.

## ▶ Contact management

Contact management is a breeze. Modify location's notification contacts for a single location or multiple locations at once. PIN managed or code automation customers are also able to manage the alarm codes.

## ▶ Daily activity dashboard

Daily activity dashboard can be set to a daily subscription delivered via email, keeping your team in the loop and on top of anomalies.

## ▶ Dual-factor authentication

Dual-factor authentication allows the eSuite administrator to enable dual-factor authentication for their company's eSuite users to assist with increased security protection.

## ▶ Keypad code management

Keypad code management is an optional feature that allows your authorized users to request edits to location contact keypad panel codes at one or multiple locations—plus, users of selected panels on IP or cell communication path can make those edits instantly.

## ▶ Location information

Location information becomes much more actionable when you have access to panel information for all locations and can store location-specific information for easy retrieval—including installed product photos, fire alarm inspection documents and more.

## ▶ Permission management

Permission management lets you create permission roles within eSuite for key personnel along with specific features and the functions that you choose to share.

## ▶ Permit management

Permit management allows you to input location permit numbers and expiration dates for convenient reporting and renewal tracking. Permit management services are also available for a monthly fee.

## ▶ Product inventory

Product inventory features allow you to run reports of all products we have installed at your locations. You can quickly view installation dates, manufacturer's lifespan information, and approximate replacement costs for budgetary planning.

## ▶ Reporting

Reporting features are robust and empower you to run dozens of standard activity and exception reports in real time, or schedule reports for recurring delivery via email. Business management reports like product inventory, financial details, and service history are also available.

## ▶ Schedules

Schedules change often so we allow you to modify existing schedules or create temporary schedules with "drag-and-drop" ease.

## ▶ System tests

System tests can be handled anytime, with the ability to place an intrusion alarm system on test and remove from test, online. Watch test signals check into our central station.

## ▶ Video verification

Video verification is a "must have" where a "verified" alarm is required to ensure a prompt response by law enforcement. Video verification service allows your security team to view video associated with intrusion alarm activity via eSuite for up to a year after each event.

# The National Strength You Want. The Local Knowledge You Need.

You can rely on us to be your One Ideal Partner for integrated solutions that help you reduce costs, mitigate risks and protect your people, property and assets.

## MAKE THE RIGHT CHOICE

▶ **Innovate with expert advice**

Benefit from decades of enterprise-level industry experience, custom designs and specialized training
